

BAYVIEW ROOFING COLLECTION

Aluminum and Steel Roofing

WHY CHOOSE A BAYVIEW ROOFING COLLECTION ROOF?

DURABILITY

Aluminum roofing is an inorganic product and won't decompose, curl or crack. It won't rot, rust or burn, making it an excellent long-term roofing choice. The Bayview Roofing Collection system has a 50-year paint guarantee and warranty.

ENVIRONMENTALLY FRIENDLY

As an eco-friendly choice, it can be installed over your existing roof and is made from recycled aluminum. It's also 100% recyclable at the end of its lifetime.

COLOUR MATCHING SYSTEM

The Bayview Roofing Collection comes with colour matching trims and can be paired with BMI's complete rainware system, for an overall seamless look for your house.

ENERGY EFFICIENT

The aluminum shingles are coated with Fluropon paint. This finish is a high-performance, field-proven coating that provides superior resistance to UV rays. Combined with aluminum's ability to dissipate heat, the roof will absorb less heat and keep your home cooler in the summer.

ALUMINUM SHINGLES

SHAKE SHINGLE

With a woodgrain embossed texture, the Shake profile gives you the look of wood roofing. Unlike traditional wood shakes, the shake profile will never split, warp, mould, or rot. Also, it is CCMC 13613 R approved, which means it can withstand up to a category 2 hurricane.

SLATE SHINGLE

The Slate profile features a deep slate silhouette to mimic the natural look and texture of stone. Slate aluminum shingles are manufactured with an embossed textured finish to ensure strength and durability, lasting a lifetime on your home.

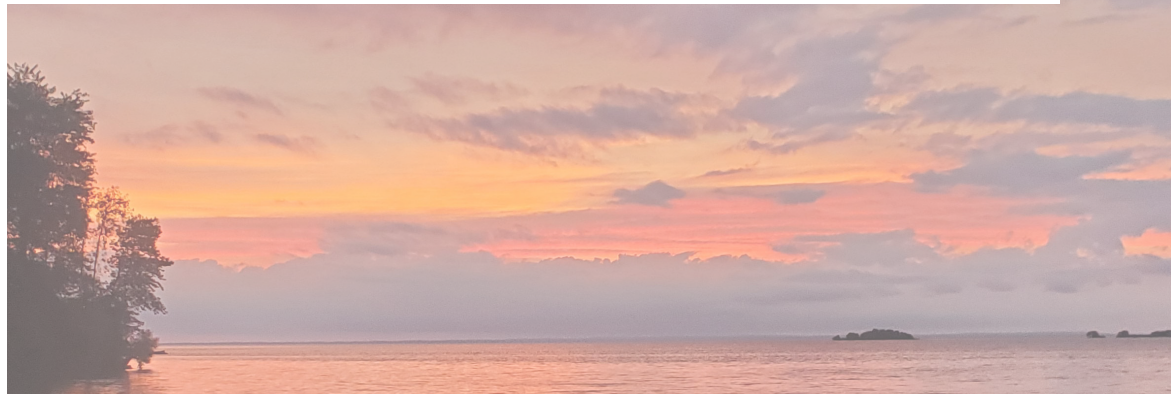

DIAMOND SHINGLE

With its unique pattern, the Diamond profile creates a distinctive look for any roofing project. The diamond embossing gives the shingle added sturdiness so that it will protect your home for the next 50 years.

SNAP-ON PANELS

Prefer a sleek and modern look for your roof instead of the traditional slate and shake? Look no further than the Bayview Roofing Collection Snap-On Panels. These roofing panels “snap” together, mimicking the look of a traditional standing seam roof but use a hidden fastener system.

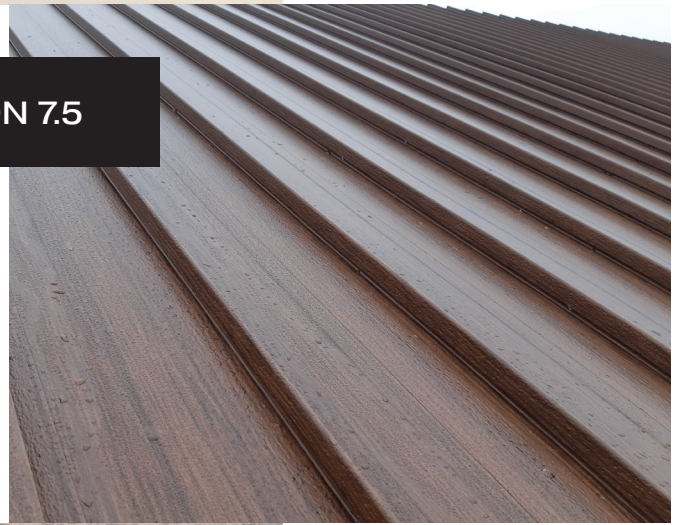

The Snap-On system is available in two profiles – 7.5 and 11 – and is available in custom lengths from 8’ to 24’. Snap-On panels are a favourite among homeowners as it is a cost effect metal roofing solution.

SNAP-ON PANELS

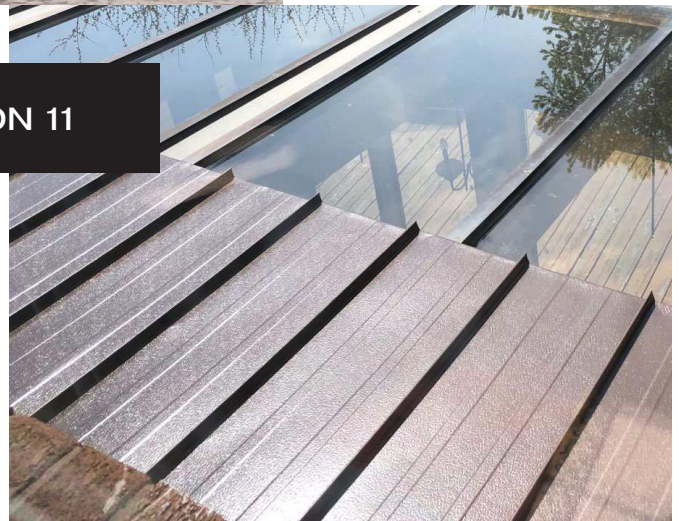

SNAP-ON 7.5

These panels are available in 0.024" thick aluminum as well as 28 gauge prepainted steel. Both are engineered for strength and resistance to harsh elements. It is available in a variety of BMI solid aluminum and steel colours and the Simcoe Series nature-inspired patterns.

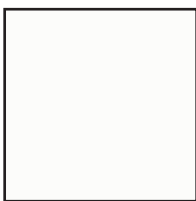

SNAP-ON 11

The Snap-On 11 panels are 11" wide and create a smooth and ageless look for your roof. Available in 28 gauge steel, these panels have two stiffening ribs and a double embossed texture to give them added strength to last on your home for 50 years.
